LIQUIDSPRING SMARTER. SMOOTHER. SAFER.

Carl Harr

National Sales Director

LiquidSpring is proud to offer the most advanced suspension system the off-road and pickup community has ever seen. Our system uses compressible liquid, allowing spring rates to change instantly as conditions change. That means a softer response to soak up potholes, rocks, and washboard roads, while still delivering firm, controlled handling when it matters most.

With **RideSync™**, the suspension automatically adjusts whether your truck is fully loaded or running empty. No switches. No guesswork. Just consistent ride comfort and control every mile. And when the day's drive is over, **Tru-Earth Leveling®** takes over, automatically leveling your truck at camp so you can settle in for the night without blocks or manual adjustments.

This is suspension that thinks for you, works in real time, and makes every drive and every destination better. Welcome to the Liquid Ride.

LIQUIDSPRING IS DRIVING INNOVATION.

MOBILITY

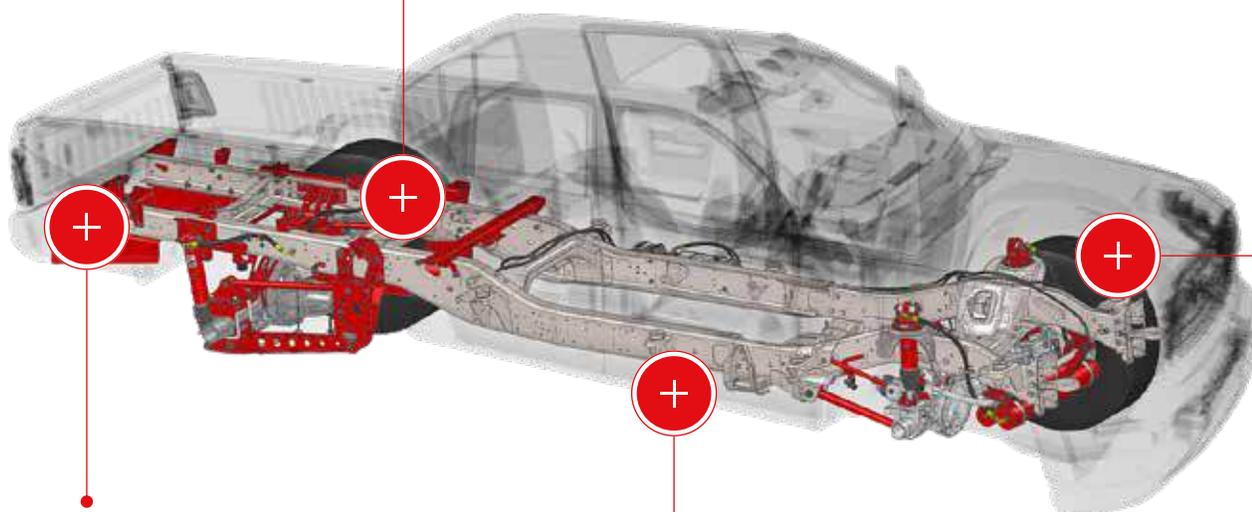

AN ACTIVE SUSPENSION TO ELEVATE YOUR ADVENTURE

HELLO, MCFLY!

Roads are optional, but a quality ride at any speed, on any surface comes standard.

PUSH YOUR LIMITS, NOT YOUR LUCK.

You can rely on LiquidSpring in any climate, at any altitude, and over any obstacle.

IMPROVISE. ADAPT. OVERCOME.

Raise & kneel your rig while in motion to maneuver your evolving environment.

NO ONE LIKES A CHATTERBOX.

Minimal vibrations = Maximum Lifespan = The Ultimate Adventure.

HOW DOES IT WORK?

Our 5-link structure is directed by an onboard microprocessor that monitors speed, steering, braking, and ride height one thousand times every second. It is always reading the terrain and reacting in real time. Using our proprietary compressible fluid as the spring mechanism, the system can instantly adjust to washboards, ruts, heavy loads, or quick changes in direction. Your truck stays steady, controlled, and comfortable, no matter if you are hauling gear down the highway or crawling your way into camp. It is a smart suspension built for the pickup owner who wants the freedom to chase any road with confidence.

WHY LIQUIDSPRING?

**BECAUSE THE ROAD
SHOULD FEEL GOOD
FROM START TO FINISH.**

RideSync™ Technology keeps your truck smooth and controlled whether you are hauling a full load or running empty, and **Tru-Earth Leveling®** turns almost any spot on the map into a place you can settle in for the night. It is comfort on the move and comfort when you arrive.

RideSync[™]

With RideSync[™], our Smart Suspension gives you the same smooth, comfortable ride whether you're fully loaded or running empty—towing, hauling, or just heading home. No compromises. No bolt-on gimmicks. Just real comfort and control every mile.

**ALWAYS IN SYNC.
ANY ROAD. ANY LOAD.**

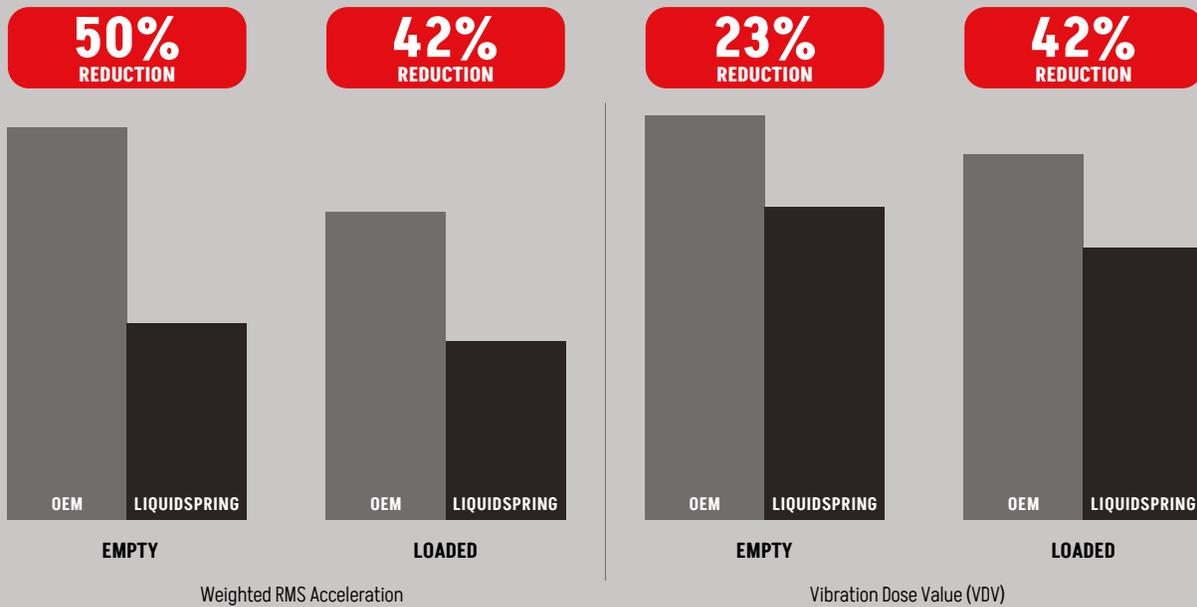

RIDESYNC[™] SMOOTHS OUT EVERY ROAD, LOADED OR EMPTY.

A smoother ride, on any road, with any load.

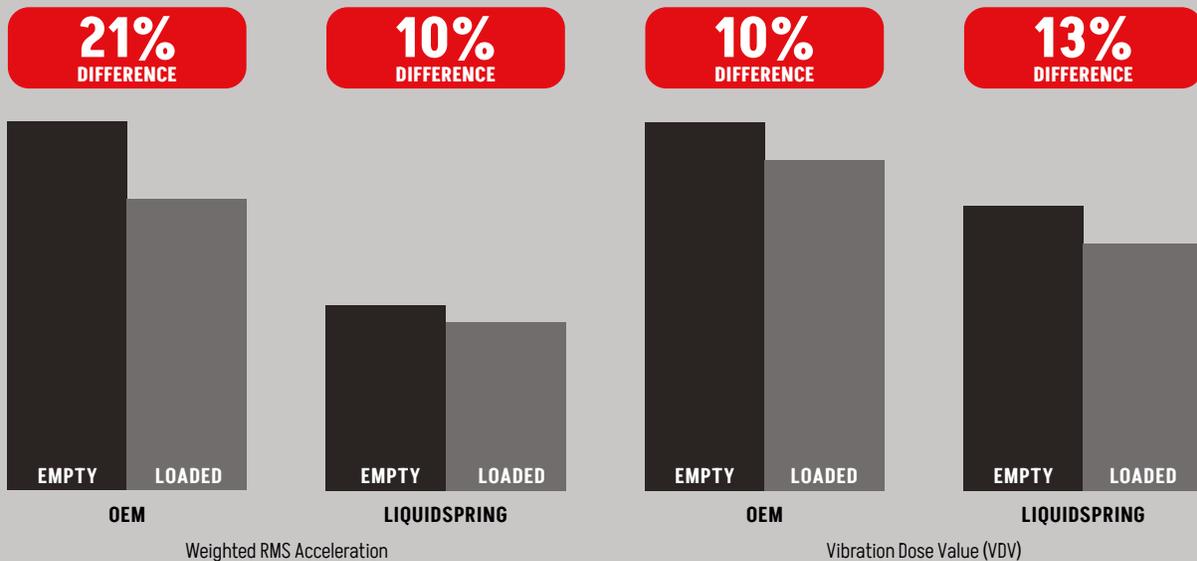

In side-by-side testing with identical trucks, LiquidSpring suspension with RideSync™ technology consistently outperformed the OEM suspension. With nine accelerometers measuring vibration and acceleration, results showed up to 50% less driver vibration when empty and smoother performance when loaded. Most suspensions are designed to handle heavy work, which means they ride rough when empty. RideSync changes that — keeping the ride smooth, comfortable, and controlled whether the truck is carrying a full load or running empty.

The outcome is clear: **LiquidSpring delivers less vibration, less fatigue, and more confidence mile after mile.**

LIQUIDSPRING SUSPENSION VS. OEM SUSPENSION

RIDE FREQUENCY COMPARISON

*Weighted RMS acceleration and VDV (Vibration Dose Value) are standard measures of vibration exposure used in vehicle testing. Lower values indicate less vibration transmitted to the driver and vehicle, resulting in a smoother, more comfortable ride

Tru-Earth LEVELING®

With Tru-Earth Leveling®, your vehicle levels itself automatically at the push of a button, no matter where you park—on gravel, grass, dirt, or uneven ground within suspension travel.

No separate jacks. No stacks of blocks. No hassle.

SHIFT, SETTLE, START YOUR ADVENTURE.

ONE TOUCH LEVELING FOR ANY TERRAIN.
