MOBILITY

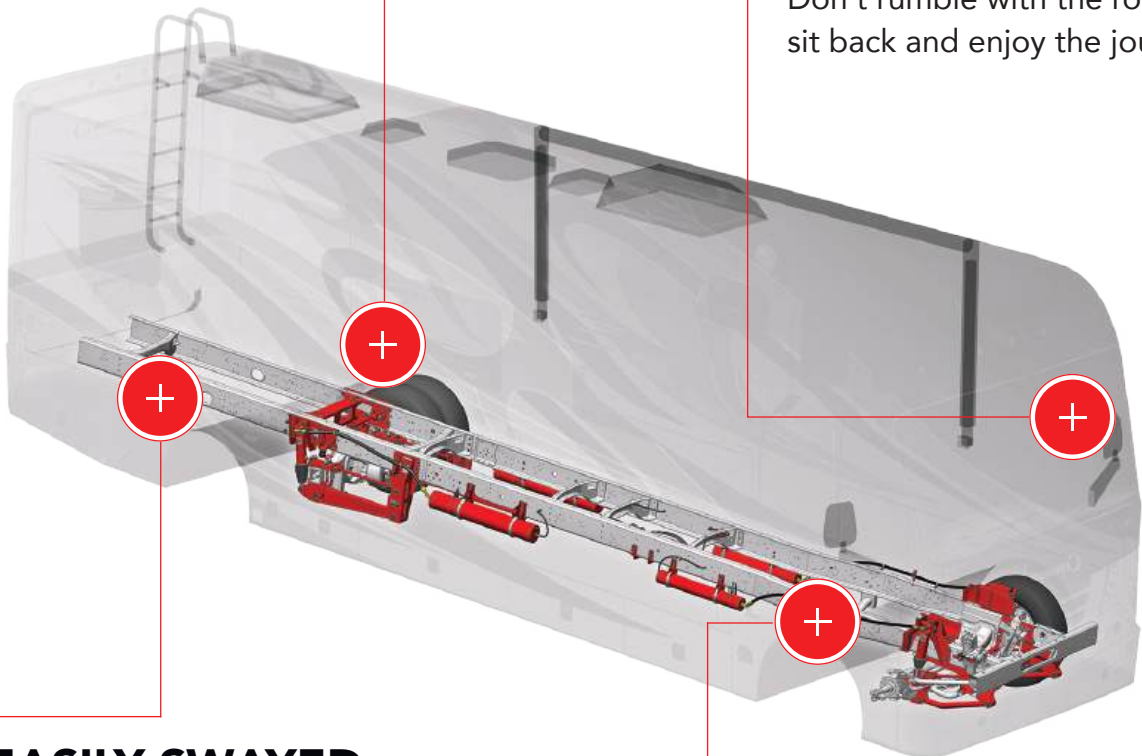

# AN ACTIVE SUSPENSION TO RELAX YOUR RIDE.

## GOOD VIBES ONLY

Eliminate the shake and rattle so you can roll.

## COOL IN THE CAPTAIN'S CHAIR

Don't rumble with the road, sit back and enjoy the journey.

## NOT EASILY SWAYED

Pushed around by semis and crosswinds? Not you!

## RESPONSIVE AND INTUITIVE

Ease into every curve, corner, and lane change with unparalleled handling.

# HOW DOES IT WORK?

LiquidSpring's advanced suspension system is designed to give your RV a smoother, more controlled ride. It features a 5-link structure guided by an on-board computer that constantly monitors your vehicle's speed, steering, braking, and ride height. By making adjustments 1,000 times per second, the system uses a special fluid-based spring to deliver the best possible comfort, stability, and handling—whether you're cruising down the highway or navigating rough roads.

*\*Find more of the fine print at [LiquidSpring.com/how-it-works](http://LiquidSpring.com/how-it-works)*

## Tru-Earth LEVELING®

With Tru-Earth Leveling®, your RV takes care of leveling on its own with a simple button press. It works anywhere you pull in for the night. Gravel, grass, dirt, or a lumpy campsite, the system levels within the suspension's travel and you're done.

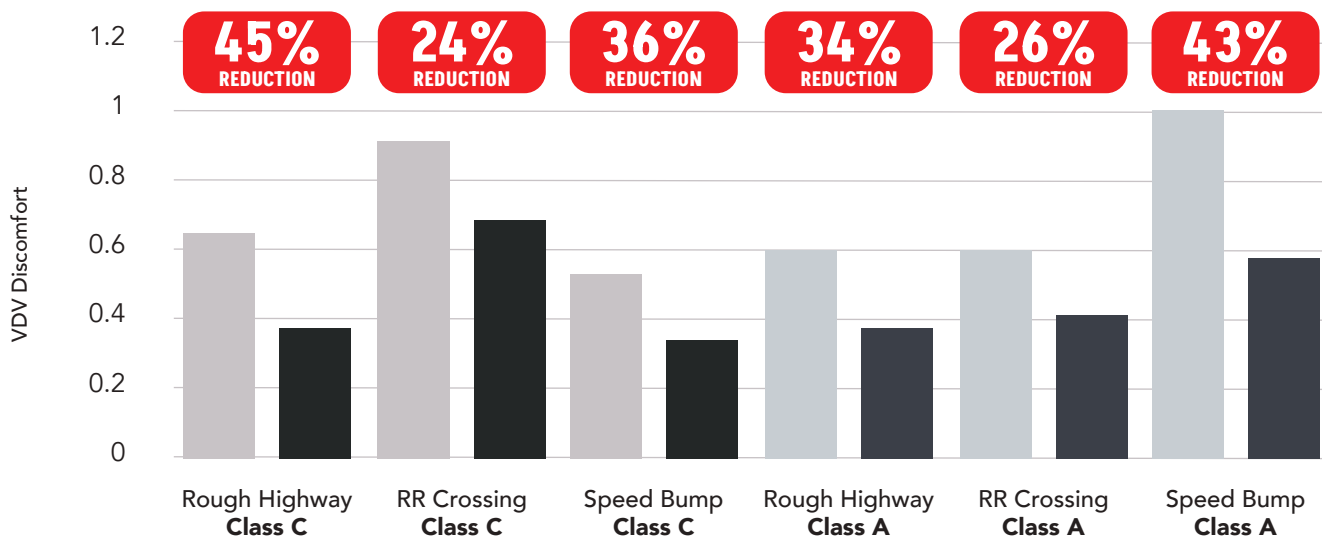

No jacks to drop. No blocks to mess with. No extra steps. Just park, press, and relax. Perfect for quick overnights, late arrivals, and off-grid setups where you want things simple and stress free.

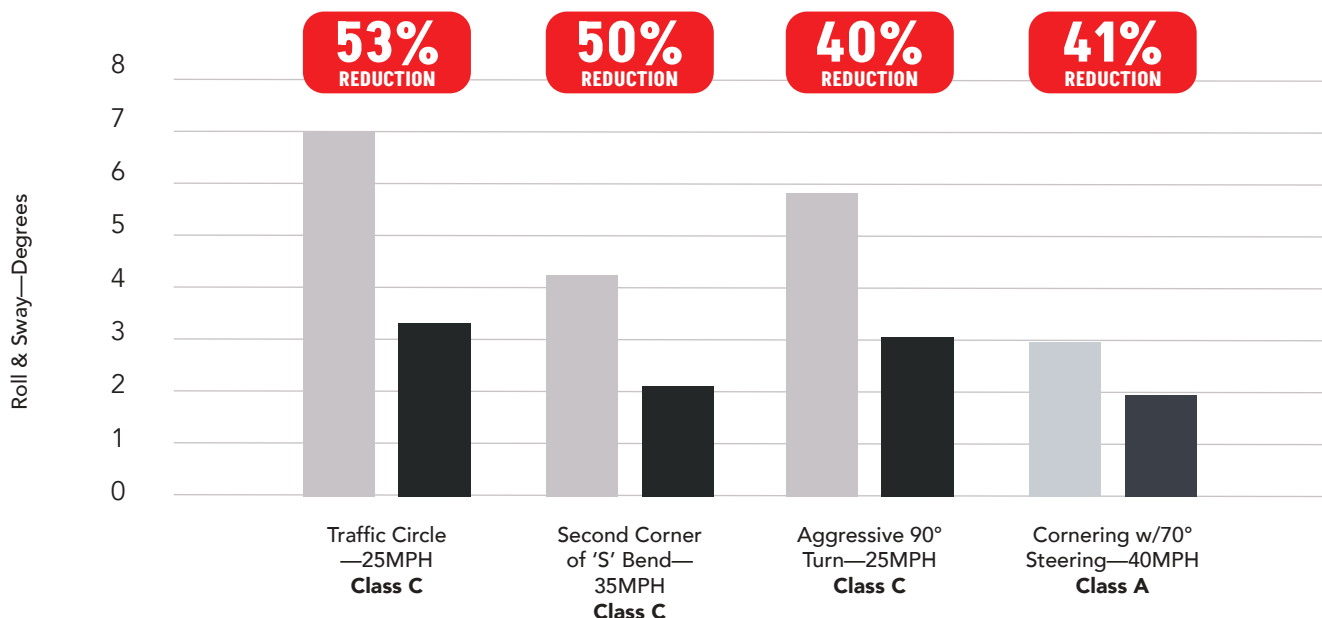

# WHY LIQUIDSPRING?

## Performance Comparison

Discomfort due to shock and vibration  
Less VDV = Less Discomfort

Safety due to handling and stability  
Less Roll/Sway = More Safety

\*VDV (Vibration Dose Value) is standard measures of vibration exposure used in vehicle testing. Lower values indicate less vibration transmitted to the driver and vehicle, resulting in a smoother, more comfortable ride

# BECAUSE YOU SHOULDN'T COMPROMISE COMFORT, NO MATTER THE ROAD.

"...whether it was a smooth highway, or a rough gravel road not built for large vehicles, our LiquidSpring system always got us there, and back, comfortably and capably.

**It definitely was one of the best upgrades we made to our coach."**

– Spencer, Adventurtunity Family

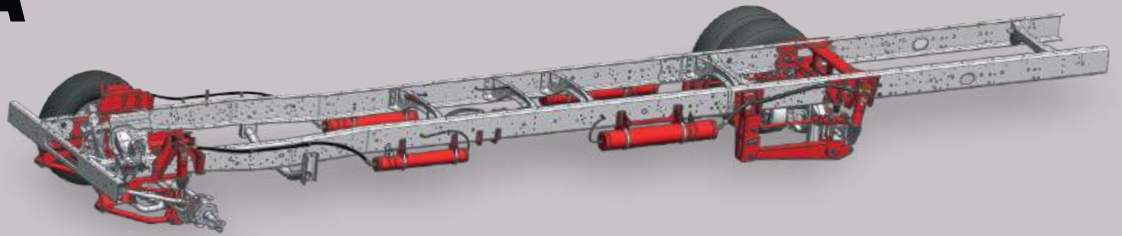

When you drive an RV with LiquidSpring, **you can feel the difference right away**. The ride settles down, the chatter in the wheel fades, and the bumps that usually rattle the whole coach turn into something far more manageable. The data proves it. Across rough highways, railroad crossings, and speed bumps, **LiquidSpring cuts shock and vibration** in a noticeable way. Less jarring. **Less fatigue. More comfort mile after mile.**

It is not just about how it feels. It is about how it handles. With LiquidSpring, **the coach stays planted and controlled** in situations that normally push a suspension to its limits. Traffic circles, sharp turns, emergency maneuvers, the numbers show real reductions in roll and sway. That means **better stability, better confidence**, and a safer drive for everyone on board.

And the best part is what it means when the drive is over. You pull into your spot feeling relaxed instead of worn out, ready to enjoy your time instead of recovering from the road. **LiquidSpring lets you step out of the driver's seat and focus on what matters most.**

"We have owned our Liquid Spring 4 Corner system for over 3 years. It has performed flawlessly and has changed the way we travel. We no longer fight wind, semi-trailers and bad handling associated with the traditional suspension on the F53 chassis."

**"Liquid Spring is the single best upgrade we have done to our motorhome!"**

– Izzy & MJ, Endless RVing
